

Pathological Society Winter School Monday 7th – Friday 11th February 2022

Fully digitized course

After the success of last year's completely digitized on-line course, the Winter school 2022 will follow the same format.

The course is aimed at Specialist Trainees in Histopathology from years ST2-5 and is based around sessions discussing cases that have been viewed by delegates prior to the course. The cases are selected by the speakers as educationally valuable cases with the FRCPATH Part 2 in mind.

The course is delivered remotely, with on-line lectures structured around digitized cases, which the delegates will have worked through prior to the course. After each lecture there will be an interactive Q & A session with the speaker, moderated by the course organisers.

The course programme runs in three yearly cycles over which time much of the core curriculum for Histopathology training is covered.

The programme will include:

1. Delegate access to the digitised cases before the course and thereafter.
2. Delegate access to the presentations after the course.
3. Case based sessions delivered by renowned speakers and experts in their fields, including topics on dermatopathology, GI, cytology, liver, medical renal biopsies, haematopathology, breast pathology, urological pathology, gynaecological pathology, paediatric pathology, neuropathology, autopsy, pulmonary pathology, adrenal gland pathology, head and neck pathology and long cases.
4. Mock exams – FRCPATH Part 2 style short surgical cases.
5. Sessions on autopsy practice conveniently held at the end of the afternoon, for those who have opted out of this area.

The course fees are:

Society Members: £250.00

Non-members: £400.00

Visit www.pathsoc.org where the draft programme will be posted and to register.

Registration will close on Friday 21st January 2022.
